

Dedicated To Green Mother Earth

Hirwai Distributes One Lakh seeds at The HITAVADA Twinkle Club membership event.

HIRWAI, a city based environmental organization working with the aim to make Nagpur the greenest city, joined hands with The Hitvada to connect with the city children and spread awareness about tree plantation. This being the right time of the year to sow seeds and grow the trees, HIRWAI decided to distribute seeds to the children and encourage them in planting and growing the trees. The packets distributed contained 5/6 different varieties of plant seeds like Karanj, Neem, Amla, Amaltas, Raintree. The response was very good and Hirwai members were confident that children will indeed sow those seeds and this year add at least a few thousand more trees to Nagpur cities greenery.

Hirwar also conducts 'HIRWAI Green School' and 'HIRWAI Green Finger' awards for the schools in Nagpur. Every year more than 2000 students from different schools participate in the event. Students, parents and their teachers look ahead every year to participate in this event and compete hard to win the prestigious 'HIRWAI Green School' award. Hirwai gets very encouraging feedback from all the participants and receive a lot of good suggestions and words of encouragement for such unique event.

Hirwai would also like to extend its appreciation to the Indian Institute of Architects who provided us valuable logistic support and ensured that we are able to meet our target of seed distribution. Hirwai really appreciates the Green Initiative taken up by the organisation.

More details about HIRWAI can be obtained from their web site www.hirwai.org
